

My name is Toots Zynsky.

So when we think about abstraction and art, we most often think immediately of Abstract Expressionism, which is stereotypically characterized as very dynamic, bold strokes of paint or other materials.

It can also simply mean art that is non-representational.

The word “abstraction,” used as a verb, can mean to reduce, take, or pull something away from something else. It can be the process of simplifying complex ideas and focusing on the essential.

Beauty is an abstract concept.

My undulating red piece is a compiled abstraction of every beautiful, essentially red thing I've ever seen.
